

CentCompras — User Manual: Purchase Orders

The Purchase Orders console · Version 1.0 · For warehouse staff (admin / manager / operator)

Companion: [Edge cases, limits & troubleshooting](#) — the reference for error messages, numeric bounds, and known gaps. [Manager catalog](#) — read-only stock + prices. [Admin & Superuser Reference](#) — users, roles, permissions, branches.

Where do I go?

Open your browser and go to:

`https://<your-domain>/manage/purchase-orders/`

(During development on your own machine: `http://127.0.0.1:8015/manage/purchase-orders/`)

Sign in with your email + password (the one your administrator gave you). This manual assumes you already know the item catalogue; see the [Item Console manual](#) for items, families, suppliers, and supplier prices. After a PO is **approved**, book the delivery in with the [Goods receipt & stock manual](#).

1. Your role — what you can do

Role	See POs	Create / edit	Approve
Admin (warehouse_admins)	[OK]	[OK]	[OK]
Manager (warehouse_managers)	[OK]	[OK] (no approve at grade 1)	[OK] (grade 2+ within EUR caps)
Operator (warehouse_data_operators)	[OK] (read-only)	[NO]	[NO]

- **Operator** sees the list but has no "New purchase order" button and no edit/status buttons.
- **Approve** is the finance step — warehouse **admins** approve any amount; **managers grade 2+** approve within EUR gross caps (self vs others); operators never approve.

Page 1 of 1

Next >

Toolbar: a **status filter** (All / Draft / Submitted / Approved / Received / Closed / Rejected) and a **New purchase order** button.

Table columns:

Column	Meaning
PO #	Purchase order number
Supplier	Who we're buying from
Status	Where the order is in the workflow
Total	The gross amount (net + VAT) — the full cost to fund
Created	Date/time (DD/MM/YYYY)
Actions	Open

Click a row (or **Open**) to see the full order in a drawer. Press **Escape** to close it (same as **Close**). If a dialog is open on top (**New purchase order**, **Add line**), Escape closes that dialog first.

3. Creating a purchase order

1. Click **New purchase order** (Nova encomenda).
2. Pick the **Supplier**.
3. (Optional) add a **Supplier ref** and **Notes**.
4. Click **Create**.

The order starts as a **Draft**.

4. Adding lines

1. Open the order (click its row).

2. Click **Add line** (Adicionar linha).
3. Pick the **Item**, enter a **Quantity**, and (optionally) a **Unit cost**.
4. Leave **Unit cost blank** to auto-fill it from the supplier's price list.
5. (Optional) set the three discounts (see §5).
6. **Save**.

The supplier must have a price for the item. If the supplier has no price for the item you picked, the line is **rejected** with a message — "This supplier does not have a price for this item. Add it under Suppliers → Supplier prices first." This is by design: a purchase order to a specific supplier should only contain items that supplier carries. To order such an item, first add its price in the item console (Suppliers → Supplier prices).

- **Edit / remove** a line is only possible while the order is a **Draft** (and needs edit permission).

5. Discounts (commercial / financial / rappel)

Each line can carry three percentage discounts:

Discount	Meaning
Commercial %	Trade discount off the unit price
Financial %	Prompt-payment / financial discount
Rappel %	Volume rebate (kept simple for now)

Rules: - Each discount is **0-100%**. - **Combined** they cannot exceed **100%** — the app rejects it if the total would make the price negative. - They apply to the net unit cost **before VAT**.

6. Net / VAT / Gross totals

Each line and the whole order shows three figures:

Figure	Meaning
Net	after discounts, before VAT
VAT	the tax amount
Gross (Total)	net + VAT — the full amount to fund

The list's **Total** column shows the **gross**.

7. The approval workflow

From	Action	To	Who
Draft	Submit	Submitted	manager/admin
Submitted	Approve	Approved	manager grade 2+ / admin (within caps)

From	Action	To	Who
Submitted	Reject	Rejected	manager/admin
Approved	Receive goods	Received	manager/admin
Received	Close	Closed	manager/admin (when fully received, this can happen automatically)

- **Submit** requires at least one line.
- Once submitted, lines are **locked** — you can no longer edit them.
- **Approve** freezes the totals (see §8).

Receive goods opens the [goods receipt console](/manage/goods-receipts/?po=<id>) (/manage/goods-receipts/?po=<id>). Recording a receipt writes stock and moves the purchase order to **Received**, then **Closed** when every line is fully received. Partial shipments are allowed.

8. Approved totals snapshot

When a manager or admin **approves** a purchase order, the **Net / VAT / Gross** figures are **frozen** and stored with the order. From then on the drawer shows those frozen figures, so the approved record is immutable — even if discount or VAT rules change later.

9. History

Every action is recorded — who did it and when: created, line added/updated/removed, and each status change. Open an order and scroll to **History**.

10. FAQ

Q1. I picked an item but the line was rejected — why? The supplier on this order has no price for that item (see §4). Add the price in the item console first, or pick a different supplier.

Q2. What does "Primary" mean on a supplier price? It marks the supplier as the preferred supplier for that item. On a purchase order, the cost comes from **this order's supplier's** price — never another supplier's.

Q3. Why can't I edit a line? Lines are editable only while the order is a **Draft**. After **Submit** they're locked.

Q4. I can't see the "Approve" button — why? Only **managers grade 2+** and **admins** can approve (within caps for managers). Grade 1 managers and operators cannot approve.

Q5. What's the difference between Net and Gross? Net is before VAT; Gross is net + VAT — the amount you actually pay.

Q6. Dates and timezone? Dates show as DD/MM/YYYY, in your local timezone (default Europe/Lisbon). **Sign out** is a small link on the Settings title row; **Help** is the blue ? icon next to the gear

(placeholder). Press **Escape** to close Settings. **Language** (English / Português) and **theme** are set on the staff dashboard (/) and remembered in this browser.
