

CentCompras — User Manual: Manager Catalog

The Manager catalog · Version 1.0 · For warehouse staff (admin / manager / operator)

Also available: [Item Console](#) at `/manage/items/` · [Purchase orders](#) · [Goods receipt & stock](#) · [Branches & Requisição interna](#) · [Edge cases & limits](#) · [Admin & Superuser Reference](#).

This is the warehouse **read-only** overview: stock, reorder level, selling prices, buying price, and suppliers on one page. You do **not** edit items here — that is the [Item Console](#).

Where do I go?

Open your browser and go to:

`https://<your-domain>/manage/catalog/`

(During development on your own machine: `http://127.0.0.1:8015/manage/catalog/`)

Sign in with your warehouse email + password. The dashboard at `/` lists this page (and the other warehouse / branch consoles) as manager catalog (stock + prices).

Branch staff do **not** use this URL. They browse the [branch catalogue](#) at `/branch/catalog/` (cost hidden, stock as a hint only).

1. Your role — what you can do

Role	Open the page	See cost (buying price)	Edit anything here
Admin (<code>warehouse_admins</code>)	[OK]	[OK]	[NO]
Manager (<code>warehouse_managers</code>)	[OK]	[OK]	[NO]
Operator (<code>warehouse_data_operators</code>)	[OK]	[OK]	[NO]
Branch staff	[NO]	—	—

- The whole page is **view-only** for every warehouse role — there is no Save, no New item, no Adjust stock.
- **Cost is warehouse-confidential.** That is why this page exists separately from `/branch/catalog/`.
- A button or column missing is **not a bug**; branch users who open `/manage/catalog/` are refused (Catalogue view permission required).
- The Django `/admin/` screen is for the **site superuser only** — it is not part of this manual.

To change an item, a price, or stock, use the consoles in §7.

2. What this page is (and is not)

Item console (/manage/items/) → create / edit catalogue
Goods receipt (/manage/goods-receipts/) → stock goes UP
Goods issue (/manage/internal-requests/) → stock goes DOWN
↓
Manager catalog (/manage/catalog/) → read the joined picture

This page does	This page does not
Show active items in active families	Show deactivated items, or items whose family is inactive
Show the cached on-hand quantity	Let you type a quantity (stock is a ledger — see goods receipt)
Show buying + three selling prices	Let you change prices (use the item console)
Flag items at or below reorder	Raise a purchase order (use purchase orders)
List suppliers that have a price for the item	Open a drawer or history

Clicking a row does nothing — there is no detail drawer.

3. The console at a glance

Manager catalog

Search code or description.

All families

All sub-families

☐ Below reorder only

Code	Description	Family	Sub-family	Unit	Stock	Reorder	Buying	Retail	Wholesale	Special	Suppliers
CEM-50	Cement 50kg	Cement	—	kg	0	20	8.50	96.00	76.80	62.40	National Ceme
CEM-25	Cement 25kg	Cement	—	kg	0	15	4.95	98.00	78.40	63.70	National Ceme
CEM-40	Cement 40kg rapid	Cement	—	kg	0	25	9.80	95.00	76.00	61.75	National Ceme
CEM-WHITE	White cement 25kg	Cement	—	kg	0	10	—	16.00	12.80	10.40	—
SAND-1KG	Sand 1kg	Aggregates	—	kg	0	50	0.90	89.00	71.20	57.85	Porto Material
GRAVEL-10	Gravel 10mm bulk	Aggregates	—	kg	0	30	1.20	55.00	44.00	35.75	Porto Material
GRAVEL-20	Gravel 20mm bulk	Aggregates	—	kg	0	40	—	56.00	44.80	36.40	—
SAND-FINE	Fine sand bag 25kg	Aggregates	—	kg	0	0	—	93.00	74.40	60.45	—
PIPE-20	Steel pipe 20mm	Pipes	—	m	0	20	3.10	91.00	72.80	59.15	BuildSupply Lt
PIPE-32	Steel pipe 32mm	Pipes	—	m	0	15	—	94.00	75.20	61.10	—
PIPE-50	PVC pipe 50mm	Pipes	—	m	0	25	—	94.00	75.20	61.10	—

A. Top bar - Title: **Manager catalog** (Catálogo do gestor) - **Settings** gear (top-right) — signed in as you@company, small **Sign out** link on the Settings title row. Press **Escape** to close the Settings panel. **Help** is the blue ? icon next to the gear (placeholder). Language and theme are set on the staff dashboard (/).

B. Toolbar (filters)

Control	EN	pt-PT	What it does
Search	Search code or description...	Pesquisar código ou descrição...	Filters as you type (internal code or description)

Control	EN	pt-PT	What it does
Family	All families	Todas as famílias	Restrict to one family
Sub-family	All sub-families	Todas as sub-famílias	Restrict to one sub-family (list scoped to the family filter when set)
Checkbox	Below reorder only	Só abaixo do ponto de encomenda	Hide items that are OK

Filters combine. They run in the browser on the loaded list — you do not need to click Search.

C. Table columns

Column	Meaning
Code	Internal code (or — if empty on a legacy row)
Description	What the item is
Family	Family name
Sub-family	Sub-family name, or — if none
Unit	Unit of measure
On hand	Cached physical quantity (from the stock ledger)
Reserved	Quantity held for approved / fulfilling requisições
Available	On hand minus reserved — what is still free to ship today
Reorder	Reorder level set on the item
Buying	Cost we pay — see \$5
Retail / Wholesale / Special	The three manual selling prices
Suppliers	Suppliers that have a price for this item; the primary is marked ★
Status	Below reorder (warning pill) or OK

Rows at or below reorder are highlighted with a warning tint **and** a Status pill. The tint follows the theme: pale amber on light, dark amber on dark, so the row text stays readable.

4. Stock and “below reorder”

On hand is the same cached physical balance as everywhere else: goods receipts add, goods issues subtract, admin **Adjust stock** corrects. **Reserved** is stock already promised to approved requisições. **Available** is on hand minus reserved. This page only **displays** these figures. If on-hand looks wrong, trust **Stock movements** on the [goods receipt console](#) — that is the ledger.

Below reorder is true when:

- the item’s **reorder level is greater than zero, and**
- **available ≤ reorder level.**

A reorder level of **0** means “no reorder trigger” — the status stays **OK** even if available is 0.

Use **Below reorder only** when you want a shortlist of items that need procuring.

5. Buying price and suppliers

Selling prices (retail / wholesale / special) are **manual** — they come from the item. Buying price is **dynamic** — it comes from the supplier price list.

The **Buying** column is one number per item:

1. If the item has a **primary** supplier (★) that is still active, that supplier's cost is shown.
2. Otherwise the **cheapest** cost among **active** suppliers is shown.
3. If no active supplier has a price, Buying is —.

The **Suppliers** column lists names (comma-separated). Deactivated suppliers are omitted. — means no active supplier price yet — add one in the item console before you can raise a purchase order for that supplier.

Prices here are **not** a frozen PO snapshot; they follow the live supplier list. Approved purchase-order totals stay frozen on the PO — see [purchase orders](#) §8.

6. Empty states and errors

Message (exact, EN)	Why	What to do
No items to show.	There are no active items in active families	Create/activate items in the item console
No items match these filters.	Search, family, sub-family, or “below reorder only” hid every row	Clear search, set family/sub-family to All, untick the checkbox
Could not load the catalog.	The catalog API failed	Refresh the page; if it persists, ask an administrator
The request could not be completed.	A request failed without a specific message	Refresh; try again
Catalogue view permission required	You are not a warehouse user (typical for branch-only logins)	Use <code>/branch/catalog/</code> instead, or ask head office for a warehouse group

The family dropdown can include **inactive** families (it reuses the families list). The table never lists items under an inactive family, so picking one of those families yields No items match these filters.

7. Related consoles

- [Item Console](#) — create/edit items, families, suppliers, selling prices, supplier prices.
- [Purchase orders](#) — restock from suppliers when the catalog shows low stock.
- [Goods receipt & stock](#) — book deliveries; that is what updates **Stock**.
- [Branches & Requisição interna](#) — branch catalogue (cost hidden) and the request / issue / receipt loop.
- [Edge cases, limits & troubleshooting](#) — error messages and numeric bounds.
- [Admin & Superuser Reference](#) — who may use which URL.

8. Language, theme & dates

Same as the other warehouse consoles:

- **Language:** English / Português — set on the staff dashboard (/) or branch catalog (/ branch/catalog/); remembered in this browser.
 - **Theme:** light / dark — same bar as language; remembered. Below-reorder row highlighting follows the theme (it is not a fixed pale yellow).
 - **Dates** are not shown on this page (no created/updated column). Quantity and money use a plain decimal format.
-

9. FAQ

Q1. Why can't I edit a price or the stock number here? This page is an overview. Change selling prices and supplier costs in the [item console](#). Change stock with a [goods receipt](#) or (admin only) **Adjust stock**.

Q2. Why is Buying “—” when I know we have a supplier? That supplier is **inactive**, or there is no supplier price for this item. Add an active supplier price in the item console (Suppliers → Supplier prices).

Q3. What does the star (★) on a supplier mean? That supplier is the item's **primary** (preferred). Its cost is the Buying figure. Only one primary per item.

Q4. Why does this page show exact stock but the branch catalogue does not? Deliberate. Warehouse staff see on-hand, reserved, and available here. Branch staff see only **In stock / Low / None** on [/branch/catalog/](#) (from **available**, not raw on-hand) — see [Branches & Requisição interna](#) §3.

Q5. I deactivated an item and it vanished from this list — is it deleted? No. Deactivated items (and items whose family is inactive) are excluded from this view. Reactivate in the item console to bring them back.

Q6. On hand is 0 but Status says OK — is that a bug? Not if **Reorder** is 0. A zero reorder level means “do not flag”. Set a reorder level greater than 0 on the item if you want the warning. Status uses **available**, so 10 on hand with 10 reserved also flags as below reorder when reorder > 0.

Q7. On hand is 10 but Available is 0 — where did the stock go? It is **reserved** for approved requisições. The warehouse queue at [/manage/internal-requests/](#) shows who holds it.

Q8. I am a warehouse operator — should I see cost? Yes. Every warehouse group that can open this page sees buying price. Cost is hidden only on the **branch** catalogue.

Q9. Can two items have the same internal code? No — codes are unique (case-insensitive) and stored **uppercase**. That rule is enforced in the item console, not here. See [Item Console](#) FAQ.

Q10. Why are some rows tinted amber? Those items are **Below reorder**. Status **OK** keeps the normal table background. The tint follows the theme (pale amber in light, dark amber in dark) so the text stays readable.
